

Eelgrass Bed Condition Monitoring Program

Become an Eelgrass Bed Condition Monitoring Volunteer!

Ways to get involved with the Morro Bay Eelgrass Recovery Project:

- Monthly Bed Condition Assessment
- Yearly Restoration Plantings
- Yearly Restoration Plantings Assessment

The time commitment is as little as a few hours/month plus a one-time training.

The data is used to guide efforts to restore eelgrass in the bay.

The **Eelgrass Bed Condition Monitoring Program** needs volunteers for Monthly Bed Condition Assessment!

Volunteers will:

- Assess various parameters of eelgrass bed condition including:
 - silt/epiphyte loading,
 - recruitment,
 - indications of disease,
 - reproductive stage
- Kayak to some locations, vessel provided
- Take water samples and process for nitrate levels in the lab

To get involved fill out our online Volunteer Interest Form.
